

Do you have a requirement for a safe off loading system to comply with the HSE endorsed BPDWG (Building Product's Delivery Working Group) guidelines on Eliminating Risk and Mitigating Risk of Falls from Height?

If so we have the solution in the form of our **Lorry Bags** and **Wallet Bags**.....These offer a system to surround a vehicle to protect personnel by offering a soft landing should they trip or fall whilst working on the bed of the vehicle or on a load

The BPDWG have highlighted the following advantages of the Soft Landing System:

- Can be used at building sites, collection sites and builders yards.
- Very low cost and minimum maintenance required
- Waterproof and flame retardant

The Lorry Bags and Wallet Bags create a simple and effective solution by connecting together to form a mattress surrounding the vehicles edge offering your personnel protection and reassurance whilst working at height

600 Type Lorry Bag

Dimensions: 2.4 x 1.8 x 0.6m

Use: Tested to protect personnel working to a fall height of 2.6m from ground level, 2.0m above the bag

1200 Type Lorry Bag

Dimensions: 2.4 x 1.8 x 1.2m

Use: Tested to protect personnel working to a fall height of 4.2m from ground level, 3.0m above the bag

Do you have Standard Bags on site and have a need to protect personnel whilst loading or unloading vehicles?

If so we have the solution in our **Wallet Bags**.....Simply place your existing Standard Bags inside the Wallet Bag which can then be used as a system to create a mattress to surround the vehicle and offer your personnel protection and reassurance whilst working at height in the same way as with our Lorry Bags. With Wallet Bags having identical qualities to our Lorry Bags these prove to be a cost effective method of achieving edge protection should you have Standard Bags at your disposal

600 Type Wallet Bag

Dimensions: 2.5 x 1.8 x 0.6m

Fill requirement: 3 nr Standard Bags

Use: Protect personnel working to a fall height of 2.6m from ground level, 2.0m above the bag

1200 Type Wallet Bag

Dimensions: 2.5 x 1.8 x 1.2m

Fill requirement: 6 nr Standard Bags

Use: Protect personnel working to a fall height of 4.2m from ground level, 3.0m above the bag

For your ease of calculation below is a guideline for the number of Lorry Bags or Wallet Bags recommended to go around standard lorry sizes:

40ft: 12 based on 5 per side plus 2 at rear doors

45ft: 14 based on 6 per side plus 2 at rear doors

60ft: 18 based on 8 per side plus 2 at rear doors
